DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 20 September 2010 has been entered.

Response to Amendment

Claims 30, 31, and 34-47 are pending.

Response to Arguments

The rejections set forth in the final Office action mailed 13 April 2010 are moot in view of the amendment. New grounds of rejection are set forth herein below.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- Claims 30, 31, 46, and 47, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- A. Claim 30 has been amended to recite wherein the covering layer comprises openings that are configured in the shape of a opening that comprise perforations.
 - i. This new limitation is indefinite for at least two reasons. First, it is unclear how a single opening can comprise more than one perforation (a opening that comprise perforations). Second, the phrasing is inclusive of openings that are shaped such that the shape is inclusive of perforations, but configured in the shape of an opening that comprise perforations is inclusive of other shapes as well, making the ultimate structure being claimed impossible to determine.
 - The Primary Examiner suggests the following amendments which may overcome the issues discussed above:
- -- wherein the covering layer <u>is perforated</u> comprises openings that are configured in the shape of a openings that comprise perforations --
- -- wherein the covering layer comprises openings that are configured in the shape of a openings that comprise perforations --

- B. Similarly, claim 46 has been amended to recite wherein the covering layer comprises openings that comprise perforations.
 - The phrase openings that comprise perforations is inclusive of other things in or concerning the openings, making the ultimate structure being claimed impossible to determine.
 - The Primary Examiner suggests the following amendments which may overcome the issues discussed above:
- -- wherein the covering layer comprises openings that comprise perforations --
- -- wherein the covering layer comprises openings that

 <u>comprise is perforat[[ions]]ed --</u>
- C. Claim 47 recites The method as claimed in claim 46 which is indefinite since claim 46 is an article claim (A coating package comprising). To overcome this rejection, claim 46 can either be amended to recite a method or claim 47 can be amended to recite an article.

Allowable Subject Matter

Claims 34-45 are allowed.

Application/Control Number: 10/581,806

Art Unit: 1715

- 7. The following is an examiner's statement of reasons for allowance: The reasons for allowance are the same as set forth under this heading in the prior Office action.
- Claims 30, 31, 46, and 47, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
- The following is a statement of reasons for the indication of allowable subject matter: The prior art neither teaches nor suggests the claimed coating package having a perforated covering layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are cited as representative of the prior art: US 4.413.621 A; US 5.160.315 A; US 5.520.629 A; and US 6.682.757 B1.
